PROFILE

Control & Automation engineering graduate (GPA 3.58/4) focused on artificial intelligence and data. Built, as part of a team, a machine learning pipeline that predicts oil-well pump shutdowns from SCADA data for the Samsung Innovation Campus AI capstone, and trained in machine learning, deep learning, foundation models and multimodal AI agents through Huawei HCIA-AI, NVIDIA Deep Learning Institute and EC-Council. Brings an engineering background in control systems and industrial robots, VMware-certified data center virtualization skills and five years of hands-on technical support.

SKILLS

Machine Learning & AI	Supervised and unsupervised learning, classification, clustering, deep learning fundamentals, foundation models, multimodal AI agents
Data Science	Python, pandas, NumPy, scikit-learn, XGBoost, matplotlib, data cleaning, feature engineering, model evaluation
AI Tools & Automation	Jupyter, Google Colab, n8n workflow automation, AI development frameworks
Data & Infrastructure	SQL, PostgreSQL, Linux, VMware vSphere, data center virtualization, Git, Git LFS
Engineering Domain	Control systems, industrial control systems, servo motors, CANopen, embedded systems

EXPERIENCE

Marketing Team Member
2025 – Present

Libyan Academy for Telecom and Informatics (LATI)

- Promote the academy's ICT training programs and communicate with prospective trainees as part of the marketing team.
- Create visual and digital marketing content for campaigns and social media (Adobe Creative Suite).
- Contributed to the academy's online registration platform and media archiving system.

Technical Support Officer
2020 – 2025

Dalil Shafi Company

- Provided day-to-day technical support for five years, diagnosing and resolving hardware, software and network issues.
- Explained technical problems and solutions clearly to non-technical colleagues.

PROJECTS

ESP failure prediction and optimal operating frequency (Data Drillers)

Samsung Innovation Campus AI capstone · team project · github.com/AnasAdda/Data-Drillers

- Built a two-stage machine learning pipeline on 4.19M rows of simulated 1-minute SCADA data from 16 oil-well pumps: shutdown detection (Logistic Regression, Random Forest, XGBoost), then root-cause classification across four failure modes.

- On wells held out from training, caught 48% of shutdowns before they happened with a median 180-minute warning, and identified the root cause correctly 68.6% of the time.
- Raised the catch rate from 19% to 48% by measuring each precursor against sensor noise and fixing two physics errors in the data simulator.
- Explored the data with K-Means and DBSCAN clustering, recommended a safe operating frequency per well, and built an offline live-monitoring dashboard.

Machine predictive maintenance

Personal project · Python, scikit-learn · github.com/AnasAdda/Predictive-Maintenance-ML

- Classified machine failure types from 10,000 records of operating data (temperatures, rotational speed, torque, tool wear), with data-quality checks, exploratory analysis and categorical encoding.
- Compared Logistic Regression, Decision Tree, Random Forest and SVM; Random Forest reached 98.6% test accuracy, with per-class precision and recall checked because failures are rare.

Graduation project: servo-driven industrial robot performance

Misurata University · CANopen

- Improved the performance of industrial robots powered by servo motors using the CANopen fieldbus protocol.

Research and Development Training Program

Lamah Technologies · Faculty of Electrical & Electronic Engineering · 2025

- Completed a 100-hour R&D program (Ofoq initiative); recognized for outstanding research skills and good engagement.

Online registration platform and media archiving system

Libyan Academy for Telecom and Informatics (LATI)

- Contributed to the academy's online registration platform and its photo archiving system.

EDUCATION

B.Sc. Electrical and Electronic Engineering (Control & Automation) — Graduated Fall 2024–2025

Misurata University, Libya · Cumulative GPA 3.58 / 4.00

CERTIFICATIONS

Samsung Innovation Campus (SIC) Libya · Samsung	2026
HCIA-AI V4.0 Training: ML, deep learning & foundation models · Huawei	2025
Building AI Agents with Multimodal Models · NVIDIA Deep Learning Institute	2026
Artificial Intelligence Essentials (AI|E) · EC-Council	2026
Data Science Essentials with Python · Cisco Networking Academy	2026
Data Analytics Essentials · Cisco Networking Academy	2026
AI Workflow Automation with n8n (workshop) · Bayan Academy	2026
Python for Everybody Specialization (5 courses) · University of Michigan · Coursera	2021
VMware Certified Technical Associate: Data Center Virtualization 2023 (VCTA-DCV) · VMware	2023

ADDITIONAL

Languages	Arabic (Native) · English (B2 · British Council Aptis)
Strengths	Analytical problem solving, Teamwork, Adaptability, Clear communication
Interests	Artificial Intelligence, Robotics, Football, Swimming
